

Clara Bennett

Software and Data Engineer

Versatile engineer with strong troubleshooting skills, a knack for gaining deep understanding of problem domains, and leadership experience. I value collaboration, impactful work, and opportunities to learn.

WORK EXPERIENCE

Google

Software Engineer, Geo Data Infrastructure

August 2016 - September 2017

- Led development of an analyst-oriented data warehouse for Geo, using **C++**
- Built and enhanced tooling for monitoring and preventing spam edits to Google Maps
- Contributed to data-integrity software

WORK EXPERIENCE

Picwell

Lead Software Engineer, Commercial Team

December 2014 - April 2016

- Led development of a new recommendation product for commercial health insurance, using **Python**, **Flask**, **Pandas**, **Scikit-Learn**, and **Apache Spark**
- Designed significant improvement to Picwell Score scaling algorithm
- Restructured app to disentangle data retrieval from business logic for clarity and testability
- Designed and prototyped a "modeling harness" wrapping **Scikit-Learn** that allows the analytics team to build deployable models
- Rebuilt client data templates to improve data quality and reduce redundancy
- Created domain-relevant interview problems to improve candidate experience
- Built engineering team site and blog

WORK EXPERIENCE

The Motley Fool

Software Developer, Wealth Management Team

April 2014 - December 2014

- Contributed to stock-recommender and managed-account apps, using **Python** and **Django**
- Built web tool for flagging bad stock price data, using **Flask**, **Pandas**, and **Redis**
- Wrote new optimizer with **Scipy** to create personalized allocation of managed funds
- Reworked unreliable legacy data acquisition code to reduce errors and provide alerting
- Discovered and fixed several layered, unnoticed bugs that prevented managed accounts from properly detaching on request
- Augmented stock-pick recommender to allow users to blacklist stocks
- Led initiative to standardize code style and evangelized code review through **GitHub** pull requests

SOFTWARE PROFICIENCIES

- Python
- Flask
- Pandas
- Git
- MySQL
- Redis
- Chef
- Ruby
- Django
- Scikit-Learn
- Numpy
- Apache Spark
- C++
- Haskell
- Scala
- PHP

WORK EXPERIENCE

NASA Goddard Spaceflight Center

Detector Systems Engineer

September 2011 - March 2014

- Designed and built experimental rig and developed **LabVIEW** software for measuring low-temperature superconductors
- Developed charge-injection protocol to mitigate effects of cosmic-ray damage on Hubble ACS imagers
- Modified the imager control software to test new injection methods and wrote **IDL** software for data analysis

TALKS

- **Git: A Peek Under the Hood**, given at PyCon 2016
- **Unblocking Your Hackathon**, given at Femmehacks 2016
- **Code Comments**, Lightning Talk, PyCon 2015
- **Introduction to Pandas**, Workshop for PyLadies DC
- **Advanced Git**: Motley Fool tech talk
- **Building a Weather App with Flask**, guest lecture for Code for Progress

EDUCATION

- Data Science, General Assembly (2014)
 - Studied and used several classification, regression, and clustering techniques, including naive Bayes, random forests, SVM, K-means clustering
- Massachusetts Institute of Technology (2006-2011)
 - Majored in physics
 - Coursework in scientific computing
 - Coursework toward a second major in Mathematics, incl. applied math and advanced algebra

WORK EXPERIENCE

LIGO

Research Intern

40m Prototype Lab
June 2009 - August 2009

- Developed **Matlab** software for optimizing environmental noise-subtraction
- Gathered and analyzed data for various arrangements of vibrational sensors

WORK EXPERIENCE

PLANET Collaboration

Research Intern

April - June 2009, June 2011

- Developed **FORTRAN** software to investigate the feasibility of using Monte Carlo methods to improve the modeling of microlensing light curves
- Recorded telescope observations in search of extrasolar planets, resulting in multiple publications in *The Astrophysical Journal*

WORK EXPERIENCE

MIT

Undergraduate Researcher

Burgasser Brown Dwarf Group
February 2007 - July 2008

- Wrote **IDL** scripts to decompose spectral images of suspected brown dwarf pairs into constituent images
- Took photometric measurements of brown dwarf observations

OPEN SOURCE CONTRIBUTIONS

- **Falcon Framework**
 - Added Jython compatibility
 - Wrote Werkzeug-inspired development server
- Bugfix to `xlsx2csv`
- Added missing column alert to `vladiate`
- Contributed to design and features for `schematics-extensions`

CONFERENCES ATTENDED

- PyCon 2017
- PyCon 2016
- DataEngConf NYC 2015
- PyCon 2015
- MLConf NYC 2015
- Spark Summit East 2015
- Spark Summit 2014
- Ruby Retrocession DC 2014

EXTRACURRICULAR ACTIVITIES

Swimming

- Youngest person to swim across the English Channel in the 2008 season
- MIT Varsity Swim Team, 2006 - 2008

Tech Community

- Mentor at Femmehacks 2016
- Organized Python Study Groups for Women Who Code DC (2015)
- Arranged Motley Fool sponsorship of DC RailsGirls Workshop (2014)
